Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 2627

- 1) The amendment filed 7/16/2007 is acknowledged.
- 2) The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- 3) (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4) Claims 1-9 and 21-24 are rejected under 35 U.S.C. 102(e) as being anticipated by COFFIN et al (6,618,348).

The rejection of claims 1-9 and 21-24 in previously office action is repeated herein.

- 5) Applicant's arguments filed 7/16/2007 have been fully considered but they are not persuasive.

First, applicant states that " COFFIN does not teach emitting a signal into a chamber formed within the cartridge engaging assembly " and " COFFIN expressly teaches that the signal detects information from cartridges located outside of the chamber of the cartridge engaging assembly. COFFIN reads the cartridges while they are still in the storage magazine, not in the chamber of the cartridge engaging assembly " (claim 1). Applicant is directed

Art Unit: 2627

to column 6, lines 12-25, the detecting can be occurred in cartridge engaging assembly 36.

Second, to identify data cartridge in cartridge engaging assembly was shown in COFFIN's column 6, lines 12-25. Further, to identify the type of data cartridge was shown in column 1, lines 5-10.

Third, applicant states that " claim 6 recites " producing a signal that is reflected by the presence of the data cartridge within said cartridge engaging assembly." Coffin does not produce a signal reflected by the presence of a data cartridge within the cartridge engaging assembly. Coffin expressly teaches that signal detects information from cartridges located outside of the chamber of the cartridge engaging assembly ". The cartridge detection apparatus of Coffin capable of performing within cartridge engaging assembly 36 (see column 6, lines 1-25).

Fourth, applicant states that "Claim 7 recites " detecting said signal when said signal is reflected from the data cartridge while said data cartridge is located inside said means for receiving " (emphasis added), Coffin does not detect whether a data cartridge is located inside the cartridge engaging assembly".

This feature can be seen in Coffin's column 6, lines 1-25. Further, the data cartridge of Coffin includes bar code for

Art Unit: 2627

reflecting signal during detecting process (see figure 4, bar code 34 and figure 5, detecting 90, 50, 82 and 88).

For those reasons the claims are sill found to be rejectable as shown above.

6) THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

7) The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant is reminded that in amending in response to a rejection of claims (if the rejection involves with any applicable arts), the patentable novelty must be clearly shown in

Art Unit: 2627

view of the state of the art disclosed by the references cited and the objection made. Applicant must also show how the amendments avoid such references and objections. See 37 CFR § 1.111(c).

Form PTO-892 is attached herein.
